

**Tethys Technology Inc. Shortlisted for “Best Automated Trading Product: Execution”
for the Technical Analyst Awards 2014**

New York – March 12, 2014 – Tethys Technology’s trading platform the TethysEMS has been short listed for “Best Automated Trading Product,” by *The Technical Analyst Awards*. The awards celebrate the best in technical analysis and trading software among providers to the institutional trading industry, as determined by a panel of distinguished judges who review award submissions from brokerage firms, exchanges and financial technology providers. *The Technical Analyst* will announce the winners at their yearly banquet in London on April 24, 2014.

Tethys Technology is the leading provider of broker neutral execution management systems, algorithmic trading analytics and transaction cost analysis. The TethysEMS platform provides a rich interface and advanced functionality for trading global equities, futures, options and foreign exchange, including cross-asset algorithmic trading. Our platform is designed for sophisticated traders seeking optimal execution through automated trading that incorporates extensive risk controls.

The TethysEMS Platform and analytics are architected to allow our clients to trade large size orders and or a large number of instruments with minimum latency, risk and market footprint while reducing slippage and maximising alpha capture. Tethys offers global co-location in New York, Chicago (Aurora), Tokyo and London allowing our client economical low-latency access to all major global markets and market data.

Tethys differentiates itself from other EMS vendors through quality and breath in the development of trading algorithms and investment strategy based automated trading functionality. The firm offers institutional asset managers a unique blend of expertise in quantitative finance, market microstructure and trading technology.
