

For Immediate Release

TethysEMS™ Receives the Best Trading System Accolade at the 2017 Technical Analyst Awards Ceremony Held in London

NEW YORK – May 4, 2017 – [Tethys Technology](#), an industry leader in financial software development for the capital markets, today announced that its TethysEMS™, the company's multi-asset trade execution system was named the 'Best Trading System' at the [Technical Analyst Awards 2017](#) at its awards ceremony in London on April 27, 2017.

TethysEMS™ provides strategy simulation, optimal trade execution, trade opportunity detection and risk management. It's rich interface and advanced functionality enables clients to trade global equities, futures, options and foreign exchange and execute cross-asset algorithmic trading. The 2017 platform release offers significantly improved order and market data processing speed and capacity. Every major component was rewritten to provide the lowest latency multi-asset EMS platform available today. The platform also includes the highly acclaimed TethysAlgo suite of highly optimized broker neutral execution strategies and algorithms, as well as comprehensive Transaction Cost Analysis data.

Per the Technical Analyst Awards judges, "The Best Trading System is Tethys Technology. Although a fairly specialised choice, the work they have done to optimise execution from market microstructure is comprehensive. In terms of the 'buy vs. build' choice, it is a solid recommendation from the 'buy' camp. We also liked the fact they presented hard numbers on the effects of slippage, which means they have done serious work behind order execution optimisation."

The Technical Analyst awards are devoted to technical analysis research and trading software for the institutional market and assessed by a panel of independent judges, each of them experts in their respective fields.

"In February, TethysEMS™ won the 'Best EMS' award at the Fund Technology and WSL Awards for its improved order process speed, capacity and market data processing. These wins further validate TethysEMS' leading performance and Tethys commitment to innovation for our clients," said Nitin Gambhir, CEO and President.
